

ANURAAG RATH

Software Application Engineer II | A.I Engineer | Enterprise AI Advisor

Chennai, India | [linkedin.com/in/anuraagrath](https://www.linkedin.com/in/anuraagrath) | huggingface.co/ChaoticEconomist | github.com/AnuraagRath

EXPERIENCE

Software Application Engineer II

Jun 2026 – Present

Amazon

- Architect enterprise-scale AI platforms, intelligent workflow systems, and full-stack applications supporting multiple Amazon organizations.
- Lead the design and implementation of production-grade Agentic AI, Retrieval-Augmented Generation (RAG), and LLM-powered solutions deployed within business-critical workflows.
- Deliver bespoke AI applications leveraging AWS Bedrock, Lambda, ECS, DynamoDB, OpenSearch, API Gateway, and cloud-native architectures.
- Own end-to-end solution architecture, spanning requirements discovery, technical design, implementation, deployment, monitoring, and operational excellence.
- Serve as a trusted AI advisor to stakeholders and engineering teams, guiding AI strategy, solution architecture, model selection, evaluation methodologies, and governance practices.
- Establish reusable AI frameworks, orchestration patterns, and development standards that accelerate AI adoption across organizations.
- Drive the modernization of business processes through intelligent automation, reducing operational complexity and enabling scalable decision-making.
- Partner with senior leadership and cross-functional stakeholders to identify high-impact opportunities for AI-driven transformation and operational efficiency.

Senior Procurement Specialist

Sep 2022 – Jun 2026

Amazon Web Services (AWS)

- Served as an Expert for critical AWS procurement workflows, contract operations, and approval processes.
- Led onboarding, mentoring, and training programs for new associates while maintaining high standards of operational excellence.
- Managed escalations, root-cause investigations, process audits, and corrective-action programs across multiple business functions.
- Developed automation and analytics tools using Python and SQL that improved operational visibility, reporting accuracy, and decision-making.
- Directed workload allocation, capacity planning, and cross-functional collaboration to consistently achieve operational performance goals.
- Earned multiple leadership recognitions including Mountain Mover Award, Highest Stakeholder Accolades, Team of the Quarter, and Problem Solver Awards.

Lead AI & Automation Developer

Apr 2023 – Jun 2026

Amazon (Photon Program)

- Served as primary AI developer, advisor, and trainer for the DigiFlex and Optimus organizations, supporting AI adoption across multiple business units.
- Led organization-wide training initiatives in Python, Generative AI, automation, software development, and AI solution design.
- Enabled dozens of teams to evaluate, design, and deploy AI-powered solutions by providing technical leadership, architecture guidance, and hands-on development support.
- Partnered with stakeholders across AWS, IMDb, Amazon Music, Vendor Management, and APAC organizations to transform business problems into production-ready systems.
- Delivered \$100K+ in documented annualized business impact through AI, automation, analytics, and workflow optimization initiatives.
- Developed a statistical matching platform for Vendor Management operations generating approximately \$19K in annualized savings.
- Led a large-scale IMDb data engineering initiative automating worldwide episodic viewership processing, generating approximately \$13K in annualized savings.
- Built enterprise analytics and procurement intelligence platforms generating approximately \$9K in operational savings.
- Developed intelligent metadata matching and enrichment systems for Amazon Music generating approximately \$7K in operational savings.
- Winner: Amazon Global Books AI Prodathon (2025), recognized for developing a high-impact AI productivity solution adopted across multiple teams and workflows.

EDUCATION

SRM Institute of Science and Technology

Master of Business Administration (MBA), Data Analytics & Marketing2019 – 2021

- Thesis: Machine learning implementation on Customers’ Purchase Dataset for Hotel Grand Central
- Rank 64 in all India Enterance exam ‘SRMJEE-M, 2019’
- Specialized in Business,Data Analytics and Marketing
- Graduated with 8.8 CGPA

Bachelor of Business Administration (BBA), Business Economics & Statistics2016 – 2019

- Graduated with an 8.17 CGPA
- Wrote a Thesis on: The Implementation of Digitalization in HRM
- Trained in Economics, Marketing, Statistics and Operations Research.

SELECTED RESEARCH

- **How Complex Is Your Workflow? A Practical Decomposable Metric for Human Work** (2026)
- **BehavioralLure: Extending LyricLure with Replay Telemetry for Hook Detection** (2026)
- **Modeling Indirect Reciprocity in the Workplace: A Dynamical Systems Analysis of Critical Transitions** (2025)

TECHNICAL SKILLS

Programming	Python, SQL
Artificial Intelligence	Generative AI, Agentic Systems, LangGraph, LangChain, Claude, AWS Bedrock, Har-ness Systems
Domain	Machine Learning, Data Engineering, Statistical Analysis, Analytics
Research	Game Theory, Complex Adaptive Systems, Computational Economics, Nonlinear Dy-namics, Mathematical Modeling
Cloud	Amazon Web Services (AWS)

AWARDS & RECOGNITION

- Winner: Amazon Global Books AI Prodathon(Hackathon) (2025):
A Custom state of the art WebResearchAssistant that has now been implemented and replicated for multiple teams such as Amazon Music, IMDb etc
- Team of the Quarter (2024)
- Mountain Mover Award (2023)
- Highest Stakeholder Accolades (2023)
- Problem Solver Recognition Award
- Selected as the only L3 associate among L4–L6 leaders across DigiFlex and Optimus to deliver organization-wide Python and AI training initiatives.
